TOXICOLOGY

CONTENTS

Volume 49 (1988)

PART 1

1st Meeting of the International Neurotoxicology Association

Introduction 1

Review Papers

The role of ultrastructural investigations in neurotoxicology
by H.B. Jones (Hertfordshire, U.K.) 3–15

Mechanism of the neurotoxicity of 1-methyl-4-phenylpyridinium (MPP^+), the toxic bioactivation product of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP)
by T.P. Singer, R.R. Ramsay, K. McKeown, A. Trevor and N.E. Castagnoli, Jr. (San Francisco, CA) 17–23

Minireview

The neurotoxicological aspects of the toxic oil syndrome (TOS) in Spain
by H. Altenkirch, G. Stoltenburg-Didinger and C. Koeppel (Berlin, F.R.G.) 25–34

Research Papers

Intracellular calcium as an index of neurotoxic damage
by S.C. Bondy and H. Komulainen (Irvine, CA and Kuopio, Finland) 35–41

Effects of 3,3′,4,4′-tetrachlorobiphenyl in the brain of the neonatal mouse
by P. Eriksson (Uppsala, Sweden) 43–48

Synthesis and utilization of neurotransmitters: Actions of subconvulsant doses of hexachlorocyclohexane isomers on brain monoamines
by F. Artigas, E. Martínez, L. Camón and E. Rodríguez-Farré (Barcelona, Spain) 49–55

Brain metabolites of lindane and related isomers: Identification by negative ion mass spectrometry
by F. Artigas, E. Martínez, L. Camón, E. Gelp and E. Rodríguez-Farré (Barcelona, Spain) 57–63

Immunochemical studies of acrylamide-associated neuropathology
by K. Hashimoto, Y. Kurosaka, H. Tanii and M. Hayashi (Kanazawa, Japan) 65–69

Lead stimulates Golgi sialyltransferase at times coincident with the embryonic to adult conversion of the neural cell adhesion molecule (N-CAM)
by K.C. Breen and C.M. Regan (Dublin, Ireland) 71–76

Brain dopamine as a target for solvent toxicity: Effects of some monocyclic aromatic hydrocarbons
by A. Mutti, M. Falzoi, A. Romanelli, M.C. Bocchi, C. Ferroni and I. Franchini (Parma, Italy) 77–82

Protection against acute hyperammonemia: The role of quaternary amines
by O. Kloiber, B. Banjac and L.R. Drewes (Cologne, F.R.G. and Duluth, MN) 83–90

The toxic effect of an AChE-inhibitor on the cholinergic nervous system in airway smooth muscle
by P. Aas (Kjeller, Norway) 91–97
Low non-neuropathic tri-*o*-cresyl phosphate (TOCP) doses inhibit neuropathy target esterase near the neuropathic threshold in *n*-hexane pretreated hens
by M.C. Pellin, E. Vilanova and J. Barril (Alicante, Spain) 99–105
Sciatic nerve neuropathy target esterase. Methods of assay, proximo-distal distribution and regeneration
by J.B. Barril, E. Vilanova and M.C. Pellin (Alicante, Spain) 107–114
The neurotoxicity of ethylcholine mustard aziridinium (ECMA) in rat brain reaggregate cultures
by A.M. Pillar, A.K. Prince and C.K. Atterwill (London and Welwyn, U.K.) 115–119
Miniature endplate potentials as a tool in neurotoxicology
by M. Csicsaky, H. Wiegand S. Uhlig, H. Lohmann and R. Papadopoulos (Düsseldorf, F.R.G.) 121–129
Lesion localisation: Implications for the study of functional effects and mechanisms of action
by J.B. Cavanagh (Surrey, U.K.) 131–136
The hippocampus as a common target of neurotoxic agents
by T.J. Walsh and D.F. Emerich (New Brunswick, NJ) 137–140
Neurotoxicologic investigations of the pesticide dichlorvos (DDVP). Effects on the central and peripheral nervous system
by I. Dési and L. Nagymajtényi (Szeged, Hungary) 141–148
Effects of toluene treatment in vivo and in vitro on the binding characteristics of [^{3}H]neurotensin in rat striatal membranes
by G. von Euler, K. Fuxe, T. Hansson and J.-Å. Gustafsson (Stockholm and Huddinge, Sweden) 149–154
Toluene induces changes in the morphology of astroglia and neurons in striatal primary cell cultures
by E. Hansson, G. von Euler, K. Fuxe and T. Hansson (Göteborg, Stockholm and Huddinge, Sweden) 155–163
Brain acetylcholinesterase after parathion poisoning: A comparative quantitative histochemical analysis post-mortem
by Y. Finkelstein, M. Wolff and A. Biegon (Haifa and Rehovot, Israel) 165–169
The pattern of pyridoxine-induced lesion: Difference between the high and the low toxic level
by G.J. Krinke and R.E. Fitzgerald (Basel, Switzerland) 171–178
The neurotoxicity of tunicamycin
by D.D. Leaver, K.M. Schneider, M.J. Rand, R. McD. Anderson, P.W. Gage and R. Malbon (Melbourne and Canberra, Australia) 179–187
Regional distribution of lindane in rat brain
by C. Sanfeliu, L. Camón, E. Martínez, C. Solà, F. Artigas and E. Rodríguez-Farré (Barcelona, Spain) 189–196
Modified ontogenesis of enkephalins and substance P containing neurons after perinatal exposure to morphine
by A.M. Di Giulio, P. Restani, C.L. Galli, B. Tenconi, R. La Croix and A. Gorio (Milan, Italy) 197–201

PART 2

1st Meeting of the International Neurotoxicology Association

Electrophysiological measures of visual and auditory function as indices of neurotoxicity
by D. Otto, K. Hudnell, W. Boyes, R. Janssen and R. Dyer (Research Triangle Park, NC) 205–218

Mechanisms of neurotoxicity and their relationship to behavioral changes
by Z. Annau and V. Cuomo (Baltimore, MD and Bari, Italy) 219–225
Vagal tone monitoring: A potential indicator of anti-cholinesterase exposure in *Macaca mulatta*
by J.A. Dellinger, H.T. Jansen, D.J. Zaber and S.G. Birnbaum (Urbana, IL) 227–235
EEG as a neurotoxicological indicator
by J. Kubát, J. Formánek, A. Fuchs, P. Řehák, P. Zajíček, J. Dvořák and M. Vaníčková (Prague, Czechoslovakia) 237–246
Convulsant effect of lindane and regional brain concentration of GABA and dopamine
by C. Suñol, J.M. Tusell, E. Gelpí and E. Rodríguez-Farré (Barcelona, Spain) 247–252
Effects of fenthion, fenitrothion and desbromoleptophos on gait, acetylcholinesterase, and neurotoxic esterase in young chicks after in ovo exposure
by M. Farage-Elawar and B.M. Francis (Urbana, IL) 253–261
Changes in plasma corticosterone and catecholamine contents induced by low doses of deltamethrin in rats
by S.F. de Boer, J. van der Gugten, J.L. Slangen and T.H. Hijzen (Utrecht, The Netherlands) 263–270
Effects of pyrethroids on the acoustic startle reflex in the rat
by T.H. Hijzen, R. de Beun and J.L. Slangen (Utrecht, The Netherlands) 271–276
Neurological examination, computerized tomography, cerebral blood flow and neuropsychological examination in workers with long-term exposure to carbon disulfide
by O. Aaserud, L. Gjerstad, P. Nakstad, R. Nyberg-Hansen, O.J. Hommeren, B. Tvedt, D. Russell and K. Rootweld (Olso, Norway) 277–282
Neurotoxicity associated with deferoxamine therapy by M.H. Freedman, M. Boyden, M. Taylor and B. Skarf (Toronto, Canada) 283–290
The effects of lead in laboratory animals and environmentally-exposed children
by G. Winneke, W. Collet and H. Lilienthal (Düsseldorf, F.R.G.) 291–298
Radiation: Behavioral implications in space
by V. Bogo (Bethesda, MD) 299–307
A discriminant analysis of neuropsychological effect of low lead exposure
by K.W. Boey and J. Jeyarathnam (Singapore, Singapore) 309–314
Long-term effects of radioprotector WR-2721 on locomotor activity and body weight of mice following exposure to ionizing radiation
by M.R. Landauer, H.D. Davis, J.A. Dominitz and J.F. Weiss (Bethesda, MD) 315–323
Ganglioside treatment of vincristine-induced neuropathy. An electrophysiologic study
by G. Favaro, F. Di Gregorio, C. Panozzo and M.G. Fiori (Abano Terme, Italy) 325–329
The effects of occupational exposure to styrene on high-frequency hearing thresholds
by H. Muijser, E.M.G. Hoogendijk and J. Hooisma (Rijswijk, The Netherlands) 331–340
Chromal focus of acquired chromatic discrimination loss and solvent exposure among printshop workers
by D. Mergler, S. Bélanger, S. de Grosbois and N. Vachon (Quebec, Canada) 341–348
Effects on human performance from acute and chronic exposure to organic solvents: A short review
by A. Iregren (Solna, Sweden) 349–358
Interactions of neurotoxicants with neurotransmitter systems
by L.G. Costa (Seattle, WA) 359–366
Biochemical changes in different brain areas after toluene inhalation
by S. Bjornaes and L.U. Naalsund (Kjeller, Norway) 367–374
Effect of lindane at repeated low doses
by J.M. Tusell, C. Suñol, E. Gelpí and E. Rodríguez-Farré (Barcelona, Spain) 375–379
Cerebral glucose uptake in lindane-trated rats
by L. Camón, C. Solà, E. Martínez, C. Sanfeliu and E. Rodríguez-Farré (Barcelona, Spain) 381–387
The effect of non-convulsant doses of lindane on temperature and body weight

by L. Camón, E. Martínez, F. Artigas, C. Solà and E. Rodríguez-Farré (Barcelona, Spain) 389–394
Low protein diet modifies acrylamide neurotoxicity
by V.K. Khanna, R. Husain and P.K. Seth (Lucknow, India) 395–401
Methodology of forensic neurotoxicity evaluation: PCB case
by R. Singer (New York, NY) 403–408
Detecting functional neurotoxicity in the course of safety evaluations with laboratory animals
by U. Schaeppi (Basel, Switzerland) 409–416
Occupational screening for neurotoxicity: Computerized techniques
by R. Letz (New York, NY) 417–424
Validation of a radial maze test for assessing learning and memory in rats
by R.E. Fitzgerald, M. Berres and U. Schaeppi (Basel, Switzerland) 425–432
Validation of a photobeam system for assessment of motor activity in rats
by R.E. Fitzgerald, M. Berres and U. Schaeppi (Basel, Switzerland) 433–439
Changes in discrimination learning and brain activity (ERP's) due to combined exposure to NO and CO in rats
by E. Groll-Knapp, M. Haider, K. Kienzl, A. Handler and M. Trimmel (Vienna, Austria) 441–447
Experimental nitrous oxide exposure as a model system for evaluating neurobehavioral tests
by F.C. Mahoney, P.A. Moore, E.L. Baker and R. Letz (Boston, MA, Pittsburgh, PA, Atlanta, GA and New York, NY) 449–457
Experimental exposure to alcohol as a model for the evaluation of neurobehavioural tests
by J. Hooisma, D.A.M. Twisk, S. Platälla, H. Muijser and B.M. Kulig (Rijswijk, The Netherlands) 459–467
Cytoskeletal proteins as targets for organophosphorus compound and aliphatic hexacarbon-induced neurotoxicity
by M.B. Abou-Donia, D.M. Lapadula and E. Suwita (Durham, NC) 469–477
Mechanisms of neurotoxicity related to selective disruption of microtubules and intermediate filaments
by P.R. Sager and D.W. Matheson (Farmington, CT) 479–492
Studies with the neurotoxicant 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) and several of its analogs
by R.E. Heikkila, S.K. Youngster, D.U. Panek, A. Giovanni and P.K. Sonsalla (Piscataway, NJ) 493–501
The use of in vivo brain dialysis of dopamine acetylcholine, aminoacids and lactic acid in studies on the neurotoxin 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP)
by H. Rollema, J.B. de Vries, G. Damsma, B.H.C. Westerink, G.L. Kranenborg, W.G. Kuhr and A.S. Horn (Groningen, The Netherlands and Riverside, CA) 503–511
The formation of reactive intermediates in the MAO-catalyzed oxidation of the nigrostriatal toxin 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP)
by A.J. Trevor, N. Castagnoli and T.P. Singer (San Francisco, CA) 513–519
Subject Index Volume 49 521–528
Author Index Volume 49 529–530
Volume Contents Volume 49 531–534
